

# IRM – INSECT REMOVAL MACHINE

Dear Sir/Madam,

We are pleased to introduce to you the Insect Removal Machine (IRM), a state-of-the-art technology designed to efficiently eliminate insects from all types of grains.

This innovative solution provides a sustainable alternative to traditional chemical treatments, which are often costly and can compromise the quality of stored grains. By using the IRM, you can not only remove pests effectively but also preserve the integrity of your grains, ensuring they remain safe and of the highest quality.

We believe that the IRM will offer substantial cost savings while enhancing the overall efficiency of your grain processing operations.

## Special Features:

- Latest technology model with low maintenance
- The machine also removes bored insect and insect stages from the grains. Typical example is Lesser grain borer, *Rhyzopertha dominica* in split pulses
- 100% chemical free technology
- Plug & Play Model.
- The machine is useful in removing adult insects besides eggs, larvae and pupae of free living insects
- This helps in arresting further build up of insect during storage of grain
- No wastage of grains.
- Shelf life of grains increased
- Highly suitable for Miller's, traders besides
- Capacity 1000 Kg per hour power saver model
- Besides insects, the machine can remove tiny sand, dust, flours from the grains
- Probability of cleaning in 8 Ft Unit is 19 Times more then the 4 Ft unit  
The Advantage of Removing Flour , Dust / is that the get Insect will not attracted to the process commodity
- The machine Removes not only live Insects but also Dead Insects and It also removes mustiness from the stored grains
- Has UV Treatment to Sterilize the insects and bugs
- Auto Dust cleaning system for next grain type can be applied into machine
